

Dr. Marysia Tweet specializes in cardiology and advanced cardiac imaging at Mayo Clinic. She obtained her undergraduate and medical degrees at the University of Minnesota in Minneapolis, MN. She completed residency and general cardiology fellowship at Mayo Clinic and she is now completing an advanced multi-modality cardiac imaging fellowship at Mayo Clinic, Rochester, MN. Her research interests include cardiovascular disease in women and acute coronary syndromes, particularly those caused by spontaneous coronary artery dissection (SCAD). Dr. Tweet is currently involved in a multidisciplinary research program to study SCAD, including investigation of the natural history of the disease, management strategies including pregnancy, genetic predispositions and comorbid conditions such as fibromuscular dysplasia. She has received several honors including the Mayo Brothers Distinguished Fellowship Award, Marinelli Endowed Fellowship Award, and American Heart Association Women in Cardiology Trainee Award.
